PREVENTATIVE MAINTENANCE FOR ANY UNITS MORE THAN THREE PLEASE CONTACT OUR OFFICE.

Preventive Maintenance Contracts are used to service Heating and Air Conditioning systems which include checking and cleaning units, checking motors bearings, checking electrical components, checking operations, flushing drains and checking Freon. Maintenance services must be scheduled in advance for the upcoming season. In order to properly maintain your system and support the longevity of the system, these services must be done in the time frame provided. Prolonging these services will result in default of your maintenance contract and possibly void your warranty from the manufactory for your HVAC system and with Fogg HVAC, INC.

Please use the information provided to properly utilize this preventive maintenance contract for your systems. Adjustments will be made for additional units. All repairs are discounted at 10% for all preventive maintenance contract customers. This contract does not include any additional parts, filters, etc. however, they can be purchased for an additional cost.

SPRING (March, April and May)	FALL (September, October and November)
Clean condensate pans, condensate	Check refrigerant levels.
traps and condensate lines to	 Check motors and controls.
prevent obstructions.	 Check heat rise and heat strip
 Clean outside coil and straighten fins 	operations.
for efficient operation.	
 Check refrigerant levels. 	
 Check motors and controls. 	

This contract is a legal agreement between both parties. The contract may not be dissolved unless both parties are in agreement. All contracts must be paid in full plus taxes with check, cash or credit card. The contract is valid for one year and must be renewed each year.

l	hereby agree to this contract on	 of this month.
